# Niger Army Coup **Ends Civilian Rule**

LAGOS, Nigeria, April 15 (AP).—The moderate government of President Diori Hamani of Niger, previously regarded as one of black Africa's stablest nations, was toppled today in an army coup.

The overthrow of Mr. Hamani's 15-year-old government was led by Lt. Col. Seyni Kountie, 43, the chief of staff of Niger's 2,500-

# Calif. Holdup Laid to SLA; 2 Wounded

SAN FRANCISCO, April 15 (AP).-Four heavily armed men and women robbed a bank today and seriously wounded two pas-sersby when they started shoot-ing wildly as they field, police and a bank security official said. Vincent Greely, security officer at the Hibernia Bank in San Francisco, said that the robbers dained to be members of the terrorist group which calls itself the Symbionese Liberation Army,

and this was not combined. Mr. Greely said two white wemen, a black man and a white man escaped with \$692.51.

The people came in and said they were members of the SLA." said. "They told people lie on the floor and then they went to the tellers' cages and took the money. They were in and out within two minutes."

There was nothing from police or the FBI to substantiate who the robbers were, or to connect them with the SLA, a group which anthorities say is heavily armed, multiracial and consists of 25 men and women.

The SLA has elaimed responability for kidnapping newspaper betress Patricia Hearst Peb. 4 and for the murder last Nov. 6 of Oakland school superintendent Marcus Foster.

#### Security Cameras

Mr. Greely said that the robbery was photographed by two security cameras in the bank and that FBI agents had taken the film and were processing it.

Asked about any possible SLA connection, Charles Bates, chief FBI agent in San Francisco, said: "We've had reports similar to this from all over the country in holdups. We are working like mad on this "

Police said that in andition to the four gunmen inside the bank, there were four accomplices waiting nearby in a car.

As the four left the bank and headed for a second car parked just down the street, they apparently panicked and began firing randomly at people on the street, police said. The two victims were reported to be in serious condition as a hospital.

Col. Kountie told a reporter for the French state television net-work in a telephone interview that Mr. Hamani was under house arrest with his family. "They are being well treated," he said. Col. Kountie reported that the coup took place without a shot being

# High Court Declines Again To Rule on Nixon's War Power

By Warren Weaver Jr.

WASHINGTON, April 15 (NYT).—The Supreme Court refused today to review a decision upholding President Nixon's right to bomb Cambodia without any authorization from Congress. The vote was unanimous and there was no opinion,

The decision was the latest in a series of occasions on which the high court has dodged answering question of whether American participation in the war in Southeast Asia was unconstitutional because Congress had never formally declared war.

Without giving any hint of their reasoning, the justices de-clined to take jurisdiction of a case brought by Rep. Elizabeth Holtzman, D-N.Y., and four Air Force officers in an effort to establish the legal principle that a president could not declare war on his own authority.

The effect of the high court decision was to leave standing a ruling by the U.S. Court of Appeals for the 2d Circuit that the legality of the Cambodian operation was a political question not reviewable by the courts and that the initiators of the suit lacked standing.

The Court of Appeals also held that Congress had implicitly acknowledged the legality of the bombing when it ordered the military to end it by Aug. 15,

Appellate Ruling

The Justice Department had urged the high court to let the lower court ruling stand, because a political question was involved and because no real legal controversy remained once the Cambodian action had been ended.

Rep. Holtzman said that she was "disappointed but not surprised" by the court's action, and expressed regret that the justices had not taken advantage of the opportunity to declare that a president cannot wage war unilaterally.

"The important thing." she said, "is that the court's refusal to take the case does not mean that it approves of the Cambodian hombing or that it found it to be constitutional."

#### Precedent Decried

Backed by the American Civil Liberties Union, Rep. Boltzman and the Air Force officers insisted that there was an important continuing question of the President's authority involved and that the Appeals Court ruling had set "a disastrous precedent" that should be corrected

The military plaintiffs in the case were members of B-52 flight crews who refused to participate in the bombing in May and June of 1973. They argued that they had legal standing in the case

pressing sympathy and support for the President, expressing continued 'respect and confidence in your integrity" and a \$1 donor who said, "1 don't believe you should pay all the taxes you claim you owe." Mr. Nixon owes \$467,000 in back taxes and interest.

Earlier, the Whit. House con-firmed that Mr. Nixon has been granted a 60-day extension of to-day's filing deadline for his 1973 White House Deputy Press

# Rebel Zapata, Dead 55 Years, Still Sets Mexican Tempers Aflame ward the gates of the hacienda.

By Stanley Meisler

MEXICO CITY, April 15 .-Many Mexicans are coming for-ward these days to defend the recutation of Emiliano Zapata, one of the heroes of the Mexican Revolution.

It may seem odd that Mexicans feel forced to defend one of their heroes but Mexican history, a conicle of much anguish and chaos, has its confusions. Zapata

is one of them. To confuse matters more, President Venustiano Carranza, the man who probably ordered Za-pata's death in 1919; is also considered a hero of the revolution. The constitution that now rules Mexico was promulgated during Carranza's administration.

The latest debate resulted from a lawsuit filed recently by Gen. Jose Juan Guajardo, the brother of the man who killed Zapata in 1919. The general claims that a

Jesus Maria Guajardo. The lawsuit, after several

months of hearings, was finally dismissed April 3 by the attorney general of Mexico. Ha said it was filed too late and, in any case, the makers of the movie did not intend to hurt anybody's reputation. But the dismissal of the suit has not ended the controversy.

Gen. Guajardo, in fact, has threatened to punish the star of the movie, Antonio Aguilar, himself if the courts fail to do so. Armed with a .45-caliber pistol and an ammunition belt, the gen-cral showed up at a pretrial hear-ing and threatened, "If the law does not punish him, I myself will execute Antonio Aguilar... I have the guts to do that and much more.

Gen. Guajardo discounted the usual historical version of how his brother killed Zapata. "I have all the newspapers of the time," he after the revolution.

four-year-old movie. "Zapata," said "and they speak of my defames his brother, the late Col. brother as a hero. That is what counted. That is the truth, and not what is written later by historians. They are men who know nothing."

Tha movic, he went on. "changes the true facts of history and makes it appear that my brother ... was a coward" and a traitor.

What are the historical facts? During the Mexican Revolution of 1910, Zapata led the peasants of the south in an uprising against Porfirio Diaz, the authoritarian president who had ruled Mexico

for a quarter of a century.

The revolution ousted Diaz. But,
after his fall, Zapata could not accept the leadership of the men who took over the country, not even of President Francisco Madero, the first hero of the revolution, This period is now regarded by historians as a time of chaotic dispute among the revolutionaries Zapata did not prolong his re-hellion to get the presidency for Zapata, hearing news of the himself. Most historians agree scandal wrote to the young Guathat he was a selfless man con-cernod about the needs and rights of the peasants.

But to the men in power, who also considered themselves revo-lutionaries, Zapata threatened stability, order and their ability to govern. His threat had to be

President Carranza ordered an offensive against Zapata and put Gen. Pahlo Gonzalez in charge. In 1919, Gonzalez, who looked on himself as a possible candidate for president, worked out a scheme to trap Zapata. It is this trap that the movie narrates.

The details have been described hy historian John Womack jr. in shot them. his book "Zapata and the Mexican Revolution." According to Mr. Womack, Col. Guajardo had been jailed for carousing in a local cantina instead of carry-

jardo and proposed that he join Zapata's troops, But the letter was intercepted by Gonzalez,

Gonzalez then accused Col. Guajardo not only of being a drunken lout hut a traitor as well, and he waved Zapata's letter at him as proof. To show his loyalty, the colonel agreed to become the major agent in the trap against Zapata. Col. Guajardo wrote to Zapata, promising to bring his units into Zapata's ranks. To demonstrate his new lovalty to Zapata, Col. Guajardo declared himself in rebellion, captured a government post, arrested former Zaoata followers who had defeeted to the government, and

On April 10, Zapata rode to Chinameca hacienda, in his native state of Morelos, to meet Col. Guajardo. As he drove toan honor guard of Col. Guajardo's troops suddenly opened fire, killing him instantly.

In the view of Gen. Gonzalez. Col, Guajarno and his surviving brother, the murder of Zapata was a lawful act carried out under the orders of a lawful government.

In a recent article, former President Emilio Portes Gil, who ruled Mexico from 1928 to 1930, said that Gen. Gonzalez had once told him, "I helieve that Zapata died in the way he deserved. He was a bandit, and if he were resurrected some day, and I had a way of killing him again, I would do it with pleasure."

The lawsuit, however, has not helped foster that point of view. Instead, it has generated a great deal of new praise for Zapata and much condemnation of Col. Guajardo.

ever, some of the other earlier cuts that were demanded seem merely embarrassing to the agency or the Nixon administration, such as a description of a cabinet-level meeting held by the president.

Rhodesia, Ted?"

"Vice President . . . Agnew gave an impassioned speech on how the South Africans, now that they had recently declared their independence, were not about to be pushed around, and he went to compare South Africa to the United States in its infant days. Finally, the President leaned over to Agnew and said gently, "You mean Rhodesia, don't you, Ted?"

Another deleted passage, which referred to Mr. Helms at a National Security Council meeting in 1969, went as follows:

"His otherwise flawless performance was marred only by his mispropulation of "Malarra"

mispronunciation of "Malagasy" (formerly Madagascar) when referring to the young republic."
The CIA's blue pencil also affected disclosures in the book that are reported in the current issue of Time magazine, and were characterized as "doubtless authentic" by an intelligence expert in Washington yesterday. Time says the book recounts that, in the 1960s, the agency

helped the government of President Fernando Belaunde Terry of Paru to crush a local insurgent movement by building a jungla military installation and recruiting an anti-guerrilla unit.

**Bolivian Operation** Several others of the original cuts, as reported by Knopf, involved assertions that the CIA had sent "special operations" personnel to Bolivia "to assist local forces in dealing with the rebel movement." The book also reports that a CIA operative tried in vain to persuade Bolivian authorities not to execute Ernesto (Che) Guevara, the rebel leader.

Knopf, the co-authors and the government have all filed notices of appeal since the March ruling that reduced the cuts to 27. The government, under pressure from opposing lawyers, had previously reduced its original list of 339 passages by half that number-including the ones now disclosed.

The legal status of the remaining deletions is unclear, pending further legal action, and Knopf fears that lack of time will require that these passages be left out of the first edition of the book, which is to come out in June.

More Than Twice Police Estimates

# Survey Questions Crime Figures in U.S. Cities

WASHINGTON, April 15 (AP). -Crime in the nation's five largest cities is more than twice as high as police figures show. according to a government study.

The survey disclosed a crime rate five times as high as police figures in Philadelphia, almost three times as high in Chicago, Detroit and Los Angeles and slightly more than twice as high in New York.

The study conducted by the Law Enforcement Assistance Administration and the Census Bureau showed that 68 of every I 600 Detroit residents are likely to be victims of serious crime.

The rates were 63 per 1.000 for Philadelphia, 56 per 1.000 for Chicago, 53 per 1.000 for Los Angeles and 36 per 1.000 for New York

8 Smaller Cities

For eight smaller cities, the rates were 48 for every 1,000 questioned in Atlanta, 46 in Baltimore, 54 in Cleveland, 43 in Dallas, 67 in Denver. 47 in Newark, 59 in Portland. Ore., and

42 in St. Louis. New York City, which has long endured international notoriety as a city of crime. was the least violent of all 13 American cities surveyed.

The findings show that not only do New Yorkers have a significantly smaller chance of heing raped, robbed or assaulted than do residents of the 12 other large cities, but also that households in New York were far less likely to be hurgiarized.

Results of the study, made public last night, carry "a strong message of public apathy toward its criminal justice institutions bordering on contempt." said LEAA administrator Donald San-

"The crime survey results demonstrate that in an astounding number of Instances Americans simply do not think it is worthwhile to report to public authorities that they have been the victims of criminal acts," he add-

ed,
The report is the second stemming from a \$10-million-a-year project to measure the extent of crime with interviewing techniques developed by census takers. The earlier report suggested that crime was twice as high as re-ported in Atlanta, Baltimore, Cleveland, Newark, Dallas, St. Louis, Denver and Portland, Ore.

In the latest study, about 150 interviewers questioned persons in about 25,000 bouseholds and 10.000 husinesses in each of the five largest citles. The survey excluded the suburbs of those cities. It also excluded visitors and city workers who live else-

Suburbs Excloded

The interviews were conducted in early 1973. Those questioned were asked whether they had been raped, robbed, burglarized or assaulted during 1972 and if so, whether they had reported the crime to police. They were questioned extensively about details of criminal incidents and their reasons for not reporting

Of those who did not report personal crime, 34 percent said they did not because of lack of proof or they felt "nothing could be done." Twenty-eight percent did not consider the crime important enough to report, and lesser percentages said the "police would not want to be bothereo." it was too inconvenient, it was a personal matter or they were afraid of reprisal.

The figures ran about the same for those who chose not to report household hurgiaries and lar-

cenies. For the five larger cities, the report showed a total of 3.1 milllon crimes committed in 1972. The LEAA cautiously compared that figure with the 1.1 million total listed in the FBI uniform crime reports, the only other collection of national crime statis-tics. The FB1 figures are a compilation of statistics reported by local police agencies and have widely criticized as inaccurate and subject to political

PARIS, April 15 (UPI).-Christian Fouchet, one of the four Gaullist caodidates for the presidency of France, left the race today and gave his support to the official Gaullist nomince, Jacques Chaban-Delmas.

"I will not be a divisive factor. I have decided with resolution and not without emotion to withdraw my candidature in favor of Chaban-Delmas," Mr. Fouchet said at a news conference.

Political sources sald that Mr. Fouchet, a pillar of Gaullist orthodoxy, would not bring a significant number of votes to Mr. Chaban-Delmas, but his move would help to heal the splits in conservative ranks.

Mr. Chaban-Delmas and his Gaullist rivals, Finance Minister Valery Giscard d'Estaing and Jean Royer, conservative favorite of small businessmen, ignored a call from influential Gaullists to withdraw from the race and allow one man to carry the Gaullist standard.

The first round of voiling for a successor to President Georges Pompidou. who died April 2, will be held may 5. Deadling for candidacies is midnight tomorrow.

#### Argentine Anti-Guerrilla War Still Lagging gan "Fight and he will return."

By Jaseph Novitski

BUENOS AIRES, April 15 WP1.—The bloody kidnapping of an American official in Argentina Friday and his release 15 hours later in Cordoba, a provincial capital, illuminated most of the anomalies of the odd underground political war that has raxed and wanted in the country for six years under six presidents.

On one side, the urban guerrillas—kidnapping, murdering and robbing for their extreme left ideal that chans must precede revolutionary change—seem to be murderously efficient terrorists. But they are apparently subject to attacks of conscience.

On the other side, there is the government led by Juan Peron, the 78-year-old populist President who has sworn to exterminate urban guerrillas. But there are signs - the mistakes made by militants and the absence of arrests - that the government campaign has not, in six months. gone much beyond slogans for radio advertisements.

They keep saying that they are going to wipe out the guerrillas. an experienced foreign observer said. But they do not seem to be willing to do the necessary things. There is a high political price to pay.

#### Fiercely Brutal The urban guerrillas who kid-

napped Alfred Laun 3d. an information and cultural affairs officer in Cordoba, on Friday morning were fiercely brutal They shot him in the stomach when Mr. Laun fought back in the living room of his bachelor home, pistol-whipped him, dragged him outside and threw him into a walting car. But the terrorists of the People's Revolutionary Army also were apparently concerned for Mr. Laun's life. Fifteen hours later, they lain him on the ground between two trucks, wrapped in two blankets with two plastic flasks of plasma laid on his chest, their contents dripping into his arms. Doctors said today that Mr. Laun was "out of danger."

The prospects for an end to the violen, political warfare between right and left in Argentina, which an Argentine sociologist calls civil war in the larval stage, are not easy to state. The war began with an unsuccessful rural guerrilla campaign in the northwest in 1965. After a lull of two years under military rule, the nuclei of the five urban guerrilla organizations now active in Argentina had been formed. Their members were middle-class Marxists and rightist Nationalists, some of them workers, who came together in the heterogeneous movement led by Mr. Peron from his exile in Madrid.

Four of the organizations considered themselves Peronists. Their tactics against three military governments from 1968 to 1973 were governed by the slo-

the label of the campaign to bring sidiary of Firestone Tire Co., and back Mr. Peron, president of held him for a \$3-million ransom Argentina and a virtual dictator that was paid. Since then, it has from 1946 to 1955. Their socialist collected more than \$20 million aims were submerged in another in ransom money, including a slogan, "History passes through The fifth organization, the Peo-

ple's Revolutionary Army, estab-lished itself as more ruthless and more extreme The Brazilian military govern-

ment broke up that country'a guerrilla organizations by using torture on suspects and their friends and encouraging policestate tactles. Carlos Marighella was shot and killed in a police ambush that also wounded two innocent bystanders. The Brazilian government thought nothing of cutting traffic along the main north-south highway in their country for three days when the army thought it had another guerrilla leader surrounded in a rural region bordering the high-

But in Argentina, the unsuccessful military government yielded power to civilian rule and invited Mr. Peron back after 18 years in exile to try to hring peace to the country. Last year. Hector Campora, a loyal Peronist, was elected President.

Mr. Campora, in his 43 days as President before he resigned to make way for Mr. Peron, made overtures to the underground left by freeing political prisoners. The four Peronist organizations surfaced but the People's Revo-lutionary Army continued its actions. In June it kidnapped John Thompson, the American

president of the Argentine subrecord \$14.2 million paid by the Exxon Corp. last month. Victor Samuelson, the Exxon executive held for ransom, is still being held prisoner.

Mr. Peron promised emergency measures against terrorism and declared war on the People's Revolutionary Army the day after his election a, president on Sept 28 by having the group declared illegal. The guerrillas responded the next day by assassinating Jose Rucct, the country's most powerful labor leader and Mr. Peron's most visible supporter

Since then, instability brought on by political violence has become the most vexing public issue in Argentina. Mr. Peron has promised all-out campaigns against terrorists, encouraged 8 frequently bloody purge of leftists in his own movement and passed a tough anti-terrorism law. But enforcement has somehow lagged well behind intention.

Peron Back at Office BUENOS AIRES, April 15 (AF). -Looking rested and fit. Mr. Peron returned to his office today for the first time in more

than three months. Since early January, he altereded to his government duties it his suburban residence of Olivos north of Buenos Aires, where cabinet meetings, appointment with high officials and even

# Chile Says It Discovered Plot By Left to Murder Cardinal

SANTIAGO April 15 (Reuters), the authorities that respect in -Chile's military junta said today that a plot had been uncovered to assassinate Raul Cardinal Silva Henriquez, archbishop of Santiago and primate of Roman Catholic Church in Chile. A junta announcement attrib-

# U.S. Navy Develops a Mine That Fires Homing Torpedo

NYT .- The Navy has developed a novel torpedo-mine that it considers one of the most radical adlances in the 400-year history of muse warfare.

In contrast to the present stationary miles, which depend upon a alup or submarine passing in their immediate vicinity, the new mine will send out a torpedo to seek out and destroy its submarme target.

As seen by top naval officers, the new mine should revive interest in mine warfare, which has been largely ignored in recent strategic planning. They also believe it will prove to be a significant adjunct in maintaining coutrol over the Atlantic sea lanes if war breaks out in Eu-

The principal threat to allied control over the Atlantic sea lanes is not so much Soriet surface ships as about 170 submarines attached to the Soviet northero fleet based in Murmansk. Under present conditions, naral planners believe it would take at least 60 to 90 days to ncutralize this threat.

The military value of the new mine, as explained by highly placed naral planners, would be to keep some of the Soriet suborarlues blocked in the Norwegian sea-to the north of the principal Atlantic sea lanes-or to destroy the submarines as they atlempt to relurn to their home bar for resupply.

Navy plans call for using the mines to set up barriers across the two principal access routes Soviet submarines Into the Atlautic Ocean. One muse field would be laid in the Denmark

# Mysteries in Libya

It is consistent with a time in which there are relatively few governments with clear mandates and well-defined authority that questions should be asked about Libya. The announcement of a diminution in the functions of Col. Meamer Qadhafi-Libyan head of state and commander of its armed forces -has been variously interpreted in many quarters. Has he been eased out of the practical workings of the Libyan government, or does he retain his old power, merely preferring to spend more time on ideology and minss organization?

Either is plausible. Col. Qadhafl is a realet, in the tradition of the Senussi who loar ruled much of Libra in fact during Turkish and Italian occupations, and who gave the country its first acknowledged king -Idris. As such, ite seems to be primarily interested in spreading his own brand of Mos-Iem revolution, and exerting the kind of persanal influence which won him praise from such oddly assorted quarters as Yugoslavia's Tito and the far-out Christian sect of the Children of God.

But it is precisely those characteristicsof the prophet, rather than the statesmanwhich have estranged Libya from many of ito Arao associates and neighbors. The failure of the intended union of Egypt and Libya is apparent-Egypt has even given citizenship to Ming Idris, who was deposed by the Qadhafi coup. And the more recent effort at union between Libya and Tunisla seems to have had the same fate. It would not be difficult to understand why more pragmatic leaders in the Libyan military government might profer to relegate Col. Qadhafi to the role of thinker and talker, while going about the actual husiness of running the country themselves.

They insist that this is not the case, but from outside Libya the truth is very hard to grasp. And at any rate, Col. Qadhafi does remain as the personal symbol of the Libran regime. He is still the Mao of the Libyan revolution, whoever may be its Chou, and whatever may be their exact relationship. And Libya's role in the world will have to be jodged on that basis, even if the government in Tripoli takes a more practical tack on specific matters.

The kind of revolution projected by Col. Qadhafi for his own country and for export is far from clear. At its heart is puritanical Monammedanism, with the drive that brought the Wahhabis to power in Arabia and enabled the followers of the Mahdi to rule the Sudan. That, thus far, the colone! has used oil and oratory rather than weapons in his jihad does not diminish the problem he poses for other Arab states-or for the world generally. His most recent commentthat the massacre at Kiryat Shemona last week was "long overdne"-is a very painful key to the nature of that problem. There are mysteries in Lihya, but perhaps the greatest of them is Moamer Qadhafi himself.

# Global Interdependence

In his opening address to the special seszion of the UN General Assembly, Secretary-General Woldhelm dealt persuasively with issues whose urgency has unfortunately been overshadowed by civisive international poltiles. Many of Mr. Waldhelm's arguments in support of a rational approach to the production and consumption of the world's resources deserve a sympathetic response from Washington.

The question that hovers over the conference is how to break through the wall of suspicion that the proceedings may merely be a pretent for another round in the power struggle between the developing and the industrialized nations, Indeed, the representatives of China and the Soriet Union have already availed themselves of the forum to replay the record of their own hostilities. along with a bid for the allegiance of the have-not countries and the politics of the

Even many delegates who applaud the speelti sestion's stated purpose simply nelleve that President Boumedlenne of Algeria proposed the conference primarily to divert attention from the Arab nations' recent oil manipulations, with their catastrophic im-

pact on many developing countries. Conscious of such fears and suspicions, Mr. Waldheim pleaded for recognition of a new need for a policy of interdependence and for agreements which would render that interdependence "a positive rather than a negative

Witbout what Mr. Waldhelm called "the political will" for action, the conditions of acute maldistribution of raw materials, dramatized by the recent confrontations over oil, will propel mankind either toward starvation or to industrial breakdown, respectively, in poor and rich nations, with similarly disastrous social, economic and political consequences in both.

There are many legitimate differences in perspective among various nations and groups, as they contemplate the effects of rising prices or growing shortages in raw materials and food, and as they try to balance instant demands for natural resources with the long-term necessity of preserving man's natural environment. Such differences, however, must not be allowed to defrom what Secretary-General heim called the main theme of the special session-"To secure the optimum use of the world's natural resources with the basic objective of securing better conditions of so-

cial justice throughout the world." THE NEW YORK TIMES.

Israeli Raids

Gen. Dayan's threats no longer terrorize anybody because the Palestinian and Lebanese people do not stand hione. Ali Arab governments and peoples will unanimously respond to any Israeli action against Lebanese territory. [Gen. Dayan's warning followed last week's Palestinian guerrilla attack on the Israell frontier town of Kiryat Shemona which resulted in the death of 18 Israelis.] Elityat Shemona has been and will continue to be one of the Palestinian commandos' strategic targets despite all Israeli precautions. We predict that Palestinian commando operations will cover the depth of Israel until the ultimate objective is achieved.

-From A! Ahram (Cairo).

The Miryat Shemona operation proves that the Palestinian commandos have the potential to launch severe blows aganist the depth of the Israeli enemy. Dazan and other Israeli leaders should remember that their arrogance of power cost Israel dearly in the October war and was the direct cause of Israel's current political crisis.

-From Al Akhbar (Cairo).

If the raids were aimed at halting the guerrillzs, their effects are questionable and perhaps even harmful to Israel. The punishment of any of those bionapped will be based on doubtful legality. Lebanon's Army is illequipped to atop the movement of small

guerrilla groups in difficult terrain. Unrest always carries the risk of unsettling Israel's most stable and peaceable neighbors. This is so whether the unrest results from the controntation between the Lebanese authorities and the Palestinians or from southern Lebanese worried, like the inhabltants of north Israel, about security,

#### Mrs. Meir's Resignation

A more basic worry thao the terrorist attack is Mrs. Golda Meir's resignation which has left Israel without an effective government. ONDON—I think it was Robert John Kannedy's presidential victory in 1960, said simply. "The Goths have left the White House." Well, heaven knows the Goths have not left Downing Street; indeed, they have taken full, grim possession of it. But in one corner of the government, at any rate, civilization is the order of the day. Roy Jenkins is back at the Home Office (he was home secretary in Mr. Wilson's previous administration, before becoming chancellor of the Exchequer), and is once again taking up the hopeless task or bringing some degree of civilization into a place which for well over 50 years has had with the briefest of intervals, a fullyjustified reputation for every kind of political and legal swinishness (I have not the smallest doubt that the majority of its officials not only believe in witches, but believe in burning tham). Almost the first thing Mr. Jenkins did on taking offica this time was to order the release of a man who had spent five years in jail for a crime of which he was wholly innocent, and to disclose in some embarrassment (for even a home secretary like Mr. Jenkins still has to work with his officials) that the truth about his innocence had begun to emerge two-and-a-half years ago, only to be blocked by the Home Office.

#### Controversy

That, as I say, was almost the first thing Mr. Jenkins did on being reappointed home secretary. The next thing he did landed him in rather more controvery; yet it was even more humane, civilized and necessary.

One of the most pitiful stories of postwar Britain has been the way in which, every time further restrictions are imposed on the immigration of colored people, tha traffic in illegal immigrants increases. It seems—indeed, it doesn't seem, it undoubtedly is so—that even the kind of living that an illegal immigrant can scrutch in Britain, together with the necessity to live in the fear of being found out and deported, is still preferable to the conditions in the countries, such as India and Pakistan, from which they come. Now the total number of such immigrants is, of course, impossible to determine precisely: but it is very unlikely indeed to be more than a very few thou-sand. The traffic, however, apart from being abominable and cruel (many such would-be immigrants have paid the smugglers all that they possessed, only to be caught the moment they came ashore), has given right-wing and out-right racist, opponents of colored immigration plenty of opportunity to keep their unsavory pot boil-

hordes of illegal immigrants over running the country.

There was, however, one enormous attraction for illegal immi. grants, over and above the better conditions they could find in Britain. The law said that an illegal immigrant, if he or she had been able to remain in the country undetected for a considerable time (the period was changed at least once) could stay legally. Under pressure for further restrictions on colored immi-gration, the Conservative govern-ment passed a law in 1071—It came into effect at the beginning of 1973—retrospectively nullifying this provision. That is, not only was the immunity obtained by residence withdrawn for all newly-arrived illegal immigraots; it was withdrawn from those who had arrived earlier and gained it. Such retrospective canceling of an immunity was repugnant even to many who believed that the immunity should be abolished for further illegal immigrants, for three reasons. First, retrospective legislation of any kind is rightly abhorrent to most people; second, at the time the bill was actually being passed, the fact that it would be removing the immunity retrospectively was concealed from Parliament and the comtry; and third, it laid many illegal immigrants, who had attained the immunity and come out of hiding, open to blackmail

#### Immunity Restored

Now Mr. Jenkins has not canceled the main provision of the 1971 act, which said that no immigrant arriving illegaly after it came into force could ever gain immunity. But what he has done is to restore the immunity to those who had gained it and had it retrospectively taken away by the legislation. The number of people involved is small; about 2,000 to 4,000, it seems Like other legal immigrants, they will be allowed to bring their dependent relatives; this may involve, over the next few years, a further 6,000-8,000 immigrants. Perhaps, in all, 10,000 more colored faces in Britain, their arrival soread over a long period, will result from Mr. Jenkins's action, while no immigrant who entered illegally after Jan. 1, 1973, will ever be able to gain legal immunity

from deportation.
It isn't very much; but it should hardly be necessary to add that it is too much for some. The far-right Monday Club has already started howling, bandying wholly imaginary figures about, and the decision will be used as a stick with which to beat Mr. Jenkins, and indeed the government generally (for of course so politically fraught a decision would not have been taken by Mr. Jenkins without consulta-tion). All the same, it is a heartening episode.

# Syrian Role In Growing Arab Split

By Joseph Kraft

DAMASCUS.-For a month now Syria has stood toe to toe with Israel, slugging it out in battles around the Golan Heights. Soldiers in battle dress can be seen everywhere in the streets, Listening to the news bulletins is a round-the-clock family pastime, "Everybody," a Syrian businessman told me, "wants to know whether it is going to be

war or peace with Israel."

The diplomatic front is as het as the military front. President Hafez al-Assad and half his covernment have just returned from a lightning visit to Moscow. The military intelligence chief here— Hikmat Kalil Chehabi-is also reporting back on talks in Washington with Henry Kissinger.

Stands Alone

Syria has been obliged to un-dertake all these activities because it finds itself, as often in the past, standing alone as the great partisan of Arab unity. Tha Arab world has split into two currents of opinion, moving in opposite directions.

One current is the so-called "front of refusal." It includes the countries and movements activeiy hostile to the efforts being made by the United States to act as honest broker in arranging a seitlement beiween Israel and the Arab states.

The spearhead of the "front of refusal" is the extremist Palestinian terrorist organization headed by George Habash, which was responsible for the massacre of 13 Israelis in Kiryat Shemona

main base for Habash, is involved, as is Libya under Col. Qadhafi. The Russians, appareotly jittery about Washington's role in producing a peace "Made in America," tend to egg on tha "front of refusal." The other current is an openly

pro-American group led by President Anwar Sadat of Egypt, Hav-ing made it up with Washington and achieved a disengagement with Israel, Mr. Sadat is urging everybody else to follow suit. In the bargain he is losing no opportunity to take a shot at the Soviet rola in the Near East. King Faisal of Saudi Arabia

who worked with Sadat to help lift the oil boycott against the United States, gives him powerful support. Both King Hussein of Jordan and the more moderate Palestinian groups have been talking with President Sadat. Algerla, despite a hard-line past, also seems to be edging into the camp of compromise.

President Assad is in the middle. He has led this country a long way from the die-hard intransi-gence which marked the Syrian role only five years ago. He has a genuine respect for the efforts being made by Secretary of State Klssinger. Hence the dispatch of

a high-level intelligence official to Washington for the disengagement talks.

But President Assad nurses deep suspicions that the Israelis want to divide Egypt from Syria by freezing disengagement where it stands now. He has not been prepared to disengage in easy stages on the Sadat model.

On the contrary, he is insisting that disengagement be tied to a full Israeli commitment to total withdrawal at an early date from lands occupied after the 1967 war. To hammer home his determination, he initiated fighting on the Golen front. For the same reason he went to

For the moment, at least, President Assad eeems prepared to wait a while. "We are reasonable: we are not saying, 'Accept our terms or we go to war tomor-row'," the chief career diplomat in the Syrian Foreign Office, Zac-caria Ismail, said in a talk the

other day.
Still, the Syrians are convinced that the only way to hold the rest of the Arab world behind them, the only way to prevent a slow drift into the Sedat position. is to raise the threat of major new fighting. With so many pressures at work here, war-though unlikely-could break out again.

# FRENCH FASHIONS

# Why Stores Don't Have Size 12+

By Hebe Dorsey

DARIS, April 15 (IHT) .- There are a number of French shops where to be size 12, or over. seems a sin. As you announce your size, everything comes to a dead halt while the selesgirl gives you that too-muchis-too-much look.

The frustration is all the greater because these are often the shops that carry the prettiest styles, the ones that are in the women's magazines. Comes a time in every woman's life whoo she. too, would like to join tha fashion parade. But no such luck. Matron she is, as a matron she will dress.

Martine Grandval, who as a designer and retailer 'MG store on Rue Bonaparte: knows the problem, has a partial explanation for il. "First of all." she said, "the

so-called stylistes are called in by blg manufacturers to supply new ideas-and make a few headlines. # Trade Bill May Not Pass In U.S. in '74

Problem of Timing Faces Senate Panel

By Edwin L. Dale Jr. WASHINGTON, April 15 (NYT).—There is a distinct posshillty that Congress will not enact the trade bill this year despite fairly widespread support for it after more than a year's

Congress. If the bill, already passed by the House, fails to clear the Senate, work on it will have to tart ali over again in a new Jongress next year. And the planned international trade negotiations known as the Tokyo Round, on which preliminary lalks are under way, would almost certainly be aborted.

The problem in the Senate is more one of time than of opposi-tion to the main provisions of the hill, although one provision, involving trade with the Soviet Union, is intensely controversial. In addition, organized labor opposes the bill as it passed the House. But both congressional administration observers doubt that this alone would kill

# Kuwait Oil Policy Seen Key in Gulf Shultz Quit By Juan de Onis In view of Kuwait's importance

BEIRUT, April 15 (NYT)—A final settlement of Kuwait's bld to acquire majority control of its largest foreign-owned oil company is regarded by all Persian Gulf producers as the key to ownership and prices for crude oil in the region.

Kuwait's 50-member national assembly is expected to vote before the end of this month on an agreement negotiated by the government with British Petroleum Co. and Guif Oll Corp. giving Knwait 60 percent owner-ship of Kuwait Oil Co.

Despite an unfavorable report on the agreement hy the assem-bly's Economic Committee, which called for new talks with the companies to achieve 100 percent Knwaiti ownership, highly placed Kuwaiti sources said they expect the assembly to approve the present agreement.

There will be no need for new negotiations with the companies on the participation agreement," a Kuwaiti oil official said.

If the assembly approves the 60-40 split in ownership, there are still major negotiations ahead, however, on the price at which the foreign companies will be allowed to huy hack the government's share of production, According to oil industry sources, British Petroleum and

Gulf have offered Kuwait \$9.50 a barrel for whatever portion of the 60 percent of production the government does not market directly.

Kuwait is reportedly still insist-

ing on a huy-back price based on 93 percent of the so-called posted price, which is now \$11.54 for Kuwait's basic crude, The difference between the two sides is about \$1.25 a barrel.

#### U.S. Aide Fears Energy Waste As Crisis Ends

WASHINGTON, April 15 (AP-DJ).-U.S. environmental protection administrator Russel Train said yesterday he fears the nation "is going to go back to its wasteful ways" of consuming energy now that the Arab oil embargo has ended

" I think that we're very complacent about this, not really recognizing that we're in for a long-term energy problem in this country," he said. "We've got to make up our minds... that we'd hetter start giving the highest possible priority to reducing the use of energy,"

Mr. Train, appearing on a television program, said a switch to smaller cars is 'probably the largest single energy saving that we could make." He noted that the market is already pushing auto makers 'very strongly in this direction," but warned that any letup might call either for government regulation or a tax on engine size.

# Siberian Mine **Work Starts**

By Theodore Shabad NEW YORK, April 15 (NYT).-The Soviet Union has started work on an Arctic mine that is expected to become the world's

largest producer of platinum. The mine, in the Norilsk district of northern Siberia, is likely to strengthen the Russians' wellestablished position as a supplier of platinum-group metals to the United States The first stages of work on the 3,500-foot-deep mine were started late last month. It is expected to reach full capacity

by 1980. Last year these metals, with mcreasing uses in the manufacture of automotive emission-control devices, represented onethird of the total value of U.S. imports from the Soviet Union Engelhard Minerals & Chemical Corp., a major manufacturer of these devices, is one of the principal hayers of palladium, platinum, rhodium and iridium from

the Soviet Union. The new project, known as the Oktyabr (October) mine has been under construction since 1969 as part of a major expansion program in the Norilsk district. This remote complex, which has devel-oped over the last three decades, also yields much of the Soviet Union's nickel, cobalt and copper.

The apparent priority given to the Norlisk development suggests that the Russians are determined to proceed with opening up Siberia's vast mineral resources desplite hardships and costs imposed by the harsh northern environ-

Details of the Norilsk expansion program were disclosed earlier this month in Pravda, Izvestia and other Moscow newspapers. Under the plans being oegotiated on a partnership hasis, Mr. Amouzegar explained, Iran would not only supply the crude oil hut would also help finance the purchase of existing refineries or the construction of new facilities.

"We do not pretend to know American marketing systems such as retailing methods, so we will leave that to our future partners," Iran, which produces 6.2 mil-

lion barrels of oil a day, did not join the Arab embargo on shipments of petroleum to the United States and other nations after the outbreak of the Arab-Israeli war last October. Iran, a non-Arab Moslem nation, continued to ship oil during

the embargo, which ended three weeks ago. However, Iran has been in the forefront of oil exporters demanding more mooey for their key commodity, a policy that its finance minister defended before the current special session of the UN General Assembly that was convened to discuss the world

crisis in raw materials. "We in Iran," Mr. Amouzegar declared, "are paying much more for everything we import-foodstuffs, fibers and minerals-and our costs are rising because of improved living standards of

many of our 32 million people. "The partnerships we are forming with the small American oil companies will be, hopefully, of some benefit to your people, However, the basic problem will not be solved as long as the nonreplenishable oil is squandered so mindlessly as it has been for so

The Iranian official, whose country has been under pressure to provide cheaper fuel to the impoverished nations along with other major producers, observed: "The two-tier system of oil rices is workable. We would need ration cards to prevent the diversion of oil from the poor countries to those who can afford

to pay.
"A better solution, and one that we have been proposing, is to create a pool of money to help the poorer countries. We have promised at least \$1 billion toward that end, and have committed \$350 million already to tha World Bank and other agencies. The partnership deals with small oil companies is another solution, he said, and such ventures have been or are being set up in South Africa, Greece, West

ermany and India. "Actually," Mr. Amouzegar recalled, "we urged such ventures

BUD

The Brando I Knew By Carlo Fiore. Delacorte Press. 294 pp. \$7.95.

Reviewed by Mel Gussow

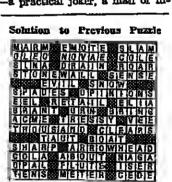

MARLON BRANDO has just ARLON BRANDO has just satiable appetites (with an a turned 50, Marlon Brando at diction for "junk food") and half-century? Por almost 30 years, from "A Streetcar Named Desire" to "Last Tango in Paris," Mr. Brando has captured the imagina-tion and teased the curiosity of the American people. Is he our greatest, or merely our most influential, actor? The more he has removed himself from his public, the more he has been written about, much of it masquerading as "unauthorized," in his case a euphemism for "unauthoritative."

While waiting for the definitive word, one can read "Bud: The Brando I Knew." a personal memoir by a friend, Carlo Flore. (Bud is Mr. Brando's childhood nickname to distinguish him from his father, Marlon Brando sr.) This, says the subtitle, is "the untold story of Brando's private life," which puts it in direct con-trast to the stack of post-"Tango" quickie biographies that reiterated 'told' stories. Mr. Fiore occasionally lapses into old anecdotes— such as the time that Mr. Brando tied the young Wally Cox to a tree and left him there—but mostly this is a first-hand, closeup impression, with the emphasis on Mr. Brando's early years as an

Mr. Fiore is like one of Heming-way's old fishing companions reminiscing about Papa's prowess at sea, except that he is here to testify about Mr. Brando's virility. They met in 1944 as young actors in Erwin Piscator's Dramatic Workshop, bot while Mr. Fiore never shared Mr. Brando's passion for acting, they were equally enthusiastic about women (and, apparently, women were equally enthusiastic about them). On page 207 the author writes, "As every feminist who has read this far must understand by now if she hasn't chewed up the book in sheer rage, Marlon is also the Ultimate Male Chauvinist Pig." I could imagine the book being ravished at a women's consciousness-raising session.

The author is no casual ob-server, but an active catalyst in that male chauvinism. The book jacket describes him as "Mar-lon's confidant, critic, employee, go-fer, co-author, procurer, standin and dialogue coach." He served in all those capacities, with em-phasis particularly on his role as procurer. Often Mr. Fiore would take a new female conquest of his to Mr. Brando's place and the actor would bed her (usually with Mr. Piore's silent consent)—although it is clear that Mr. Brando found many women on his own, In the course of this brisk book we learn a great deal about Mr.

Brando's sex life, which, admittedly, is enough to assure a certain commercial success. Mr. Fiore also gives us valuable glimps other aspects of this extraordinary man. The Brando that emerges is a mass of contradictions and. in most respects, very unlike Stanley Kowalski, He was devoted to his mother (an affectionate portrait by Mr. Fiore) although ambivalent about his father. He is generous with his friends, and occasionally brutal with intruders -a practical joker, a man of in-

some areas rigid to the point being moralistic. One of his continuing conflicts with the authoris over Mr. Flore's use of drugs From the first, he is seen as man of enormous raw talent even when in his earliest work he is ignored by the critics. Mr. Flores is often, eagerly, backstage watching Mr. Brando—in "I Remember Mama." "Truckline Café." "Candida." "Streetcar." The picture is of an actor so obsessed that in order der to play a man half-drowned, he had himself drenched with buckets of water before every performance. Years later, looking back on Truckline Café. Mr.

Brando said, "I was insane then "I The author seems to regret the loss of that manity—that actor intensity As Mr. Brando turns from sta to films, the author's proximity dims (and so do his perceptions).
Their relationship is erratic. He skims through Mr. Brando's career, omitting most of the pictures in which he was not personally involved. He was dialogue coach on "Sayonara," and he of-fers an indelicate (and amusing) story about a journey to a getsha house. The two of them begin cal-laborating on "A Burst of Vermi-lion," a suitcase full of scenes that slowly evolves in "One-Eyen Jacks," Mr. Brando's only attempt at directing a movie, From Mr. Flore's position—farther and far-ther off stage (the last time they met was in 1968)—we see the actor in limbo, and then, briefly from a great distance, we see his re-emergence in "The Godfather"

and "Last Tango." Throughout the book, the anthor's attitude is a mixture of, envy and admiration. The root of their relationship, the shared bond, is the pursuit of women, Among the many photographs of author and subject is one of Mr. Brando munching an apple while Mr. Piore, as usual, watches. The caption reads. "Marion and the author discussing a woman."

As a matter of fact, we need your office for the lawyers who will be working on the President's impeachment." "I still think you're making a

mistake," the energy crisis said, The counselor replied coldly: "We know what we're doing or we wouldn't be in the White House. Oh, by the way, the President asked m. to give you this set of cuff links with his seal on it to show his gratitude for all you did for him. I guess that's all. Now if I could just have your key to the men's room."

# **Johnny Mercer** Sings Songs of Johnny Mercer

By Henry Pleasants

LONDON (IHT).—At a time when most singers of his age (64) are more likely to be talking about singing than doing it granting exceptions for Bing Crosby and Perry Como-Johnny Mercer is just beginning to feel his vocal cats.

One reason, of course, is that for the past 40 years he has been too busy writing songs for others to sing. When you hear "One for My Baby," "Come Rain or Come Shine," "Laura," "Moon River," "Days of Wine and Roses," "Jeepers, Creepers," "Blues in the Night," "Autumn Leaves" and "That Old Black Magic," you think of Frank Sinatra, Andy Williams, Nat King Cole, Billie Holiday and many uther singers who have found in Mercer's lyrics the seeds of musical evergreens.

He is busy with words here right now, too, doing the lyrics for the songs André Previn is writing for a new musical based on J. B. Priestley's "The Good Companions," scheduled to open in July. But he is also taking time off from the typewriter to slip over to the Pye studios in Bryanston Street and cut a couple of albums on which "Johnny Mercer Sings the Songs of Johnny Mercer."

It all began last summer when Mercer was in London, and Ken Barnes asked him to take part in a BBC radio program he runs called "The Song Stylists." Barnes suggested to a dubious Johnny Mercer that he try his voice on a ballad type of song that Mercer had Blways thought better left to the Sinatras of this world. The results were both surprising and pleasing, not least to Johnny Mercer. They encouraged him, with Ken Barnes as prodder and producer, to venture his first

It's a sound to hear and a sight to see. Now sporting a grayish stubble beard, and with rimmed spectacles shading brown roguish eyes, Mercer stands off in a corner of the studio behind mike and music stand, out of sight to the jazz band backing him. arms extended as if in tenuous flight, portly body swaying to rhythms of the swing era, and you recall Leonard Feather's assessment of him as a singer in "Tbe Encyclopedia of Jazz": "A good rbythm singer in a semi-jazz vein." What is astonishing to one who remembers descriptions of a "high distinctive voice" is a bassbaritone sound in which you hear echoes of Bing Crosby, Frank Sinatra and Billy

"I suppose I really have two volces," he observed a day later in the Mayfair flat he and his wife, Ginger, have taken while "The Good Companious" is in preparation. "The baritone is my natural voice. The high-pitched voice is one that Paul White-

Johnny Mercer, left, with Harry Roche, arranger.

man wished on me, or encouraged. I joined his band in 1932 after winning a Paul Whiteman Pontiac Youth of America contest, and became one of the third set of Rhythm Boys. Paul, at that time, bad a thing about Amos 'n' Andy. He wanted to work that kind of dialogue into some songs for Jack Teagarden and me, Jack was already well established as a baritone, so Paul just said, 'Jack will sing low, you sing high.

"I had had previous experience taking the top voice in bibulous quartet singing down in Savannah, Ga., where I was born and raised, when we would get together in a bar or a car and have fun with some of those wonderful old songs like the one about the goat that used to eat the laundry off the clothes lines. Remember it? The family decided to solve the problem by tying the goat to the railroad tracks, but the goat threw up a red flannel shirt and flagged the train. Which reminds me: whatever did become of humor?

But to get back to Whiteman, I'm a good mimic, so I had no trouble with the Amos 'n' Andy-like routines, Later on I sang on radio and made records with other singers, notably with Bing Crosby and Nat Cole, both baritones, So there I was on top again, which is why people who beard me on radio in Bing's Kraft Music Hall programs, or on my records with Nat, think of my voice as high-pitched,"

What Mercer had said about his gift for mimicry-his wife calls him a chameleon -and the echoes of other singers in his way with a song, suggest a capacity for assimilation that probably has a lot to do with his preference, as a lyric writer, for setting words to melodies already composed. "At a guess," he said, "not more than 10 percent of the songs I have written began with my lyric. I seem to need the mood established by R good melody. It gives me something to adapt myself to. The tune, if you're locky, will suggest both a subject and a manner of approaching it. The rest is hard work."

One is tempted to add: and an affinity for language, the ear and the instinct that told him, for example, to change the dead leaves of Joseph Kosma's "Les Feuilles Mortes," a hit for Juliette Greco, to be "Autumn Leaves" that became a hit for Nat Cole, or that found in the words "do, do that voo-do" in a song by Cole Porter the poetic germ of "That Old Black

If Mercer's adaptability has much to do with the way he matches voice to song when he sings, or matches words to melody when he writes, it probably also explains why he has been able to work successfully and compatibly with a greater variety of composers than any other lyric writer. He speaks admiringly and affectionately of them all. They include Jerome Kern, Richard Whiting, Harry Warren, Henry Mancini, Michel Legrand, Johnny Van Heusen and; most especially, Harold Arlen. He is also the first to acknowledge his

debt to the many excellent singers who have sung his songs and come up with big hits. He would be the last to suggest, as one would who had heard Sinatra sing "One for My Baby" or Billie Holiday sing "Come Rain or Come Shine" or Billy Daniels sing "That Old Black Magic," that Mercer lyrics tend to make a fine melody articulate and to bring out the best in a

#### Lollobrigida Calls Barnard 'an Idiot'

Italian film star Gina Lollobrigida, 45, flew into Johannesburg over the weekend and did some name calling. She said that heart transplant surgeon Christian Barnard, with whom her name was once linked, was an "idiot," according to a UPI report.

Told of Lollobrigida's remarks, Barnard said, "I don't care." His first wife, Aletta, published Love Letters From Gina to Barnard." During subsequent court action, the actress said that she could not "blame myself for having had a sincere feeling for a man the whole world loved and admired at the time." She lost the action against Barnard's wife and a German magazine. Now, she says, "I have no wish to see this man again. He is an idiot, a cheap publicity-seeker. I am a top film star."

While maintaining a public posture of support for Spine President Nixon tried Agnew. through his aides to persuade the Vice-President to resign last fall, according to a new book on the Agnew case. The maneuvers are described in "A Heartbeat Away," by Washington Post reporters Richard M. Cohen and Jules Witcover.

Alexander Hzig, chief of the White House staff, is said to have served as the go-between for Nixon in dealings with Agnew and his attorneys. Agnew eventually made a deal with the Justice Department, resigned Oct. 10 and pleaded no contest to a single charge of tax evasion.

Nixon's dilemma, according to Cohen and Witcover, was how to deal with Agnew in view of the fact that he did not want a precedent set. In particular, the book says, Nixon was worried about Agnew's taking what was called the "impeachment track." "This option ... was fraught with ommous parallels for the President himself." The authors say that the decisive incident behind Agnew's resignation was a Sept. 10 meeting involving the Vice-President, one of his lawyers, presidential counsel J. Fred Buz-hardt and Haig. "Abandoning the White House's addiction to circumlocution and subtlety," the authors say of Haig, he . "let Agnew have it. The Vice-President had to resign. It was a simple, straightforward demand, and Haig kept hammering sway Bt it.".
